Profil

I am a passionate, innovative and proactive fullstack developer, capable of designing and developing interactive websites and complex web applications with elegant and creative concepts. I am talented in project management, endowed with an insatiable desire to constantly learn, a leader in problem solving with a great capacity to adapt to situations and to manage stress.

Professional experiences

Web developer à Talents BTP SARL, Brest, France

JUIN 2021 — JUILLET 2021

- Design and creation of the entire company website taking into account the company's needs and the client's requirements
- Connection to the custom domain name and hosting support on Microsoft Office 365 services
- Linking the contact page to a professional email address

Technologies used: HTML, CSS, Bootstrap, Javascript and Node.js

Intern in the IT department à Heineken Burundi (Brarudi), Bujumbura, Burundi

AOUT 2021 — SEPTEMBRE 2022

- Managed the company's telecommunications system and learned how internal systems are connected and administered by the network administrator
- Integrated a physical server machine in a server room
- Ensured good customer support for the company's members in case of technical problems

Web Developer à Eglise Adventiste du 7e Jour, Brest, France

MARS 2022 — JUILLET 2022

- Took on a project to create an interactive website with a sleek design tailored to the website style of international churches
- Connected to a custom domain name and deployed the application on Heroku for continuous integration
- Planning to create a database and an admin area to give free access to non-developers to post their content without access to the code

Technologies used: HTML, CSS, Bootstrap, Javascript, Node.js + MongoDb (Database)
